

# NETWRAP DIAGNOSTIC CHECK-LIST

Before calling Tama Assist - please use this check-list to diagnose any possible causes

## Product

- Is core protruding each end uniformly ?  YES /  NO
- Is core wet/damp or deformed ?  YES /  NO
- Is roll outer deformed in any way (bump on profile or missing threads) ?  YES /  NO

## Baler

- ① Are both net tension springs fitted and correctly adjusted ?
  - ❗ To ensure full and uniform net tension
- ① Is there loose netwrap on the outer roll surface (behind the brake bar) when roll is in net box ?
  - ❗ Ensure net is tight on roll to avoid slack continuing into the roll, which will not allow net to spread or cut cleanly
- ① Are feed rollers adjusted uniformly ?
  - ❗ To ensure net is carried to bale uniformly
- ① Are all metal surfaces that the net contacts with clean and free of dirt or rust?
  - ❗ To avoid damage to net
- ① Is the net box clean and free of crop residue or dirt/stones ?
  - ❗ To avoid damage to net and avoid net not being able to spread fully
- ① Are the bale chamber side walls shiny and free of paint or rust ?
  - ❗ To avoid net damage on bale from not ejecting immediately
- ① Is tailgate ramp damaged ?
  - ❗ To avoid net damage on bale when ejected
- ① Are belts, belt joiners or chamber rollers damaged ?
  - ❗ To avoid damage to net on bale surface
